	REAR SIGHT	GROOVED OPTICAL SIGHTING SYSTEM
ACCESSORIES	ADDITIONAL RAILS, SLINGS, AND OTHER ACCESSORIES ARE AVAILABLE.	
WARRANTY	N/A	

All Specifications are Averages and Subject to Change

**DETAILS**

The GL1 is capable of delivering accurate blunt trauma inducing batons, combination baton/chemical rounds, non-pyrotechnic barricade penetrating projectiles, as well as pyrotechnic chemical agents.

The GL1 achieves exceptional accuracy by combining a rifled barrel, calibrated sighting, and a family of ammunition manufactured to quality standards which maximizes performance.

The six groove rifling of the GL1 spin stabilizes projectiles which allows for superior accuracy. Additional rails are available to mount optics, illumination devices, or slings. Fixed, folding, and collapsible stocks are also available upon specification.
