WARRANTY	5 YEARS IF STORED PROPERLY	
All Specifications are Averages and Subject to Change		

DETAILS

The Sage HTM60 is a single source 60MM pyrotechnic munition specifically designed for maximum outdoor smoke coverage.

The device is quick burning and provides a medium volume of CS or Screening Smoke. Designed specifically for outdoor use in crowd management situations, the Sage HTM60 allows you to quickly increase area coverage with a single deployment due to its dense smoke producing capabilities. The average discharge time is 30 +/- 10 seconds.

This device should be deployed using wind advantage. Launching the Sage HTM60, rather than hand deploying, will also provide those deploying this munition with greater stand-off distances.

The Sage HTM60 hand thrown munition is pyrotechnic and should not be deployed indoors or near flammable areas due to its potential fire capabilities.
