**DETAILS**

The KO8 is a direct fire soft impact baton round that is designed to be used in situations where kinetic energy is preferred for the incapacitation of hostile and/or non-compliant individuals.

Available in either standard or less-energy, the KO8 soft kinetic energy baton is most effective within each energy level variations designated range of 20 meters or 100 meters.

Shot placement is the most important aspect in the deployment of the aforementioned systems and that operators should be properly trained and familiar with using less-lethal impact munitions.
