

DETAILS

The SB6 is a non-pyrotechnic chemical muzzle blast munition primarily used for tactical crowd management or close quarter situations. It is designed to deny entry into sensitive areas or relocate and disperse unruly groups or hostile intruders by delivering a cloud of chemical laden powder immediately upon firing.

The SB6 is offered in CS, OC, or practice powder variations. As a non-pyrotechnic munition the SB6 can be utilized both indoors and outdoors as a chemical compliance device.

Additionally there is no chance of canister “throw-back” when utilizing the SB6 because the active micro-pulverized chemical agent is not contained in a separate canister.

Upon firing, the payload is dispersed at the launcher’s muzzle into a large cloud and will travel approximately 30 feet (9.1 meters), making it extremely effective in close quarter situations. The SB6 is particularly effective for use in riots, police line protection, barricade situations, and on concealment areas such as attics or crawl spaces.

It is stressed that the operator firing SB6 munitions and all team members in the surrounding target area wear suitable gas masks for protection against CS and OC agents. Extreme care should be exercised never to shoot directly at a human torso as the expulsion closure cap could cause serious injury.

MODEL	SB6 - ALL VARIANTS			
CALIBER	37MM SMOOTH BORE			
OVERALL LENGTH	4.8” (121.92mm)		8.0” (203.20mm)	
EFFECTIVE RANGE	SB6P	25-30 FEET (7.6 -9.1 M)	SB6P/L	25-30 FEET (7.6-9.1 M)
	SB6CS		SB6CS/L	
	SB6OC		SB6OC/L	
ACTIVE AGENT	CS (CHLOROENZALMALONONITRILE)			
	OC (OLEORESIN CAPSICUM)			
AGENT WEIGHT	SB6P	1.1oz (31.2 grams)	SB6P/L	N/A
	SB6CS		SB6CS/L	N/A
	SB6OC	0.2oz (5.6 grams)	SB6OC/L	N/A
DISCHARGE TIME	INSTANTANEOUS			
WARRANTY	5 YEARS IF STORED PROPERLY			
All Specifications are Averages and Subject to Change
