

MODEL	SG6
HEIGHT	5.87" (12.91cm)
WIDTH	2.12" (5.38cm)
EFFECTIVE RANGE	20 x 20 ROOM (400 SQ FEET)
FIRING MECHANISM	GRENADE TOP
ACTIVE AGENT	OC (OLEORESIN CAPSICUM)
FORMULATION WEIGHT	5.98 OZ (170 GRAMS)
CANISTER MATERIAL	SEAMLESS ALUMINUM RATED 2Q
WARRANTY	5 YEARS IF STORED PROPERLY
All Specifications are Averages and Subject to Change	

DETAILS

The SAGE SG6 6oz Chemical Aerosol Grenade is perfect for dispersing small groups, pre-entry and area denial in hallways, stairways, garages, crawlspaces, attics, buses and medium sized rooms. This unit can also be used in a cell to help aid in prisoner extraction.

The SG6 is a continuous discharge aerosol that releases its payload as a high intensity fog for maximum area coverage. The unit has a protective cap to cover the actuator, as the device will instantly discharge when activated.

Our formulation of Oleoresin Capsicum (OC) combined with a non-flammable carrier makes it safe to use our aerosol sprays with Electro Muscular Disruption devices.

Labels are waterproof and carry Serial Numbers, Expiration Dates, Stock Numbers, Delivery System and additional necessary information for easy identification.

Custom blends are available upon request to meet your department requirements.
